PROBLEM STATEMENT

Driving EV Adoption in India

Developing widespread, accessible EV charging

Making EVs Affordable to all

Public Awareness & Outreach of EVs

E2Ws Dominates the EV Sales

South India drives 45% EV sales

MARKET AND SEGMENT ANALYSIS

Target Segments for Electric Vehicle Adoption in India

Segment	Demand	Competition	Potential
 Electric Two-Wheeler	E2Ws led 55% EV sales, driven by urbanization & fuel costs.	Ola, TVS, and Ather lead a competitive market of 200+ players	E2W sales are projected at 1.5-1.7M units in 2025, driven by government support
 Electric Three-Wheeler	E3Ws holds 35% of EV sales, driven by urban last-mile connectivity needs.	Mahindra Electric and new entrants are driving E3W demand	Growth driven by urbanization, emissions mandates, and sustainable transport
 Electric Fleets	Air pollution pushes electric fleet for green logistics	Logistics companies & startups are looking into EVs for green transport	Growth from cost savings, incentives, and electric delivery and transport

Watt's Next?
A Greener Future!

MARKET LANDSCAPE

E2Ws & E3Ws Penetration in India - 6.7%

6.34% growth Y-o-Y Financial Year 23-24

22.42% Compound Annual Growth Rate (CAGR)

COMPETITORS

Surat (20,150) and Jaipur (18,600) led sales, followed by Ahmedabad (17,300), Mumbai (13,800), Chennai (13,710), and Nagpur (13,730)

Govt. 2030 targets: 30% EVs in E4Ws, 70% in commercial vehicles, 80% in E2W/E3Ws.

Detailed Analysis

MARKET SEGMENTATION

POLICY & INVESTMENT SUPPORT

FAME II: ₹10,000 crore to boost EV use and manufacturing

EMP Scheme ₹500 crore scheme to boost EV manufacturing and green mobility.

India exports 25% of auto components, becoming a global sourcing hub

Hyundai to invest \$2.45B in Tamil Nadu for EVs, battery assembly, and 100 charging stations

Target costumers - What they seek?

URBAN COMMUTER

- Lack of Charging Infrastructure
- High Upfront Costs
- Limited Awareness & Information
- Performance Concerns

THE ECO-CONSCIOUS FAM.

- High Initial Costs & Cost Efficiency
- Range Anxiety for Family Trips
- Focus on Safety and Space
- Sustainable Lifecycle

DELIVERY SERVICE OWNER

- High Operational Costs
- Range Anxiety
- Customizable & Durable Design
- Sustainability and Brand Image

YOUNG TRENDSETTER

- Style and Innovation
- Tech-Savvy Features
- Cost Efficiency with a Twist
- Eco-Responsibility & Social Status

GO-TO-MARKET STRATEGY

BUSINESS MODEL – BATTERY AS A SERVICE

KEY PARTNERS	KEY ACTIVITIES	COST STRUCTURE
- Battery manufacturing and distribution vendors - EV manufacturing companies - Local government bodies	- Reaching out to manufacturing and distribution stakeholders - Acquire land and resources to setup stations - Creating a distribution network to manage demand at each station - Build the tracking technology	- Land, resource and labor costs to build the swapping stations - Acquiring batteries for initial setup - Distribution network - Deploying tracking technology
KEY RESOURCES	CUSTOMER SEGMENTS	VALUE PROPOSITIONS
- Building the battery swapping infrastructure - Supply channels for all stations	- Private vehicle owners - Taxi fleets - Quick commerce companies	- Significant reduction in long waiting hours - Battery availability as per need of the customer - Advanced technology to track nearest swapping stations
CHANNELS	RELATIONSHIPS	REVENUE STREAMS
- Offline stations with swapping facility - Online app to understand battery availability	- Loyalty programs - Influencer campaigns - Government collaborations - Marketing through online and offline channels	- Monetize battery swapping - Subscription model for EV manufacturers to collaborate

RISK MAPPING AND MITIGATION

PROJECTED TIMELINE

Thank You

We appreciate your time and consideration.
